PROFESSIONAL SUMMARY

Full Stack Developer with around 2 years of experience designing and building scalable, production-grade web applications across the MERN stack and TypeScript/Node.js ecosystems. Skilled in developing responsive frontends with React.js and Next.js, building secure RESTful APIs and backend services with Node.js, Express.js and Knex.js, and designing relational and NoSQL database schemas in MySQL and MongoDB. Experienced in end-to-end feature ownership — from database design and API development to payment gateway integration, SEO-friendly architecture, and cloud deployment — for clients across healthcare, education, travel, aviation, and food-tech domains, **Immediate Joiner and available to start immediately.**

KEY ACHIEVEMENTS

- Delivered 12+ production web applications end-to-end (frontend + backend) across healthcare, education, travel, aviation, and food-tech domains.
- Integrated Stripe and Razorpay payment gateways with refund handling across multiple client platforms.
- Built AI-powered content automation (OpenAI/Gemini-based) for SEO metadata, blog content, and service pages, cutting manual content-creation effort by an estimated 95%.
- Designed and built a multi-tenant SaaS platform (ONAP) supporting menu management, order processing, and payment workflows.
- Reduced manual vote-tallying time by 80% by building a real-time, role-based election/voting platform for 50+ candidates.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, SQL
Frontend	React.js, Next.js, HTML5, Tailwind CSS, SCSS, Bootstrap, Redux, Zustand
Backend	Node.js, Express.js, Knex.js, Mongoose, REST API Design, JWT Authentication, EJS
Databases	MySQL, MongoDB
UI Libraries	Ant Design, Material UI, Shadcn UI, DaisyUI, Chart.js
State Management	Redux, Redux Toolkit, Zustand, Context API
DevOps & Tools	Git, GitHub, Docker, Postman, Figma, Adobe XD
Cloud & Deployment	Vercel, Render, Firebase, AWS
Integrations	Stripe, Razorpay, Payload CMS, Cloudinary, DLT Messaging Services

PROFESSIONAL EXPERIENCE

Arramton Infotech Pvt. Ltd.

MERN Stack Developer

Sept 2024 – July 2026

Delhi, India

- Developing ONAP, an ongoing full-stack, multi-tenant restaurant ordering and management platform, using TypeScript, Node.js and MySQL with Knex.js, covering menu management, order processing, and payment workflows.
- Delivered 8+ end-to-end web applications (frontend + backend) for clients across healthcare, education, travel, and e-commerce domains, including NKS Hospital, Delhi Public School, Aerospares India, Vedic Voyages, GD Goenka Healthcare, Prosper Lighting, Skylight Airways, and Sathi Vakil.
- Built and consumed RESTful APIs in Node.js/Express, integrating MongoDB and MySQL databases to deliver scalable, secure, and maintainable full-stack platforms.
- Collaborated with a senior developer on the official Arramton Infotech company website, contributing to a professional brand presence and improved site performance.

- Customised and shipped 4+ client websites (Sartaj Pharma, Helpy, Tresor Overseas, The Ninja Care) within a 3-month internship, translating business requirements into functional web solutions.
- Implemented SEO-focused architecture (semantic HTML, metadata, optimised page structure) that improved organic visibility and search performance across client websites.

PROJECTS

ONAP – Restaurant Ordering & Management Platform

TypeScript, Node.js, MySQL, Knex.js, Stripe

- Overview: A multi-tenant SaaS platform enabling restaurants to manage menus, accept online orders, process payments, and handle refunds, built with a TypeScript/Node.js backend and MySQL via Knex.js.
- Designed core database schema covering menu categories, menu items, modifiers/allergens, payment events (immutable ledger), and refunds, working within MySQL-specific constraints such as native enum limitations, JSON column types, and lack of partial indexes.

NKS Hospital – Healthcare CMS & Booking System

Node.js, React.js, MongoDB, DLT, Ant Design

- Built a custom CMS and Admin Panel to manage doctors, departments, and appointment/holiday scheduling — developed frontend and backend independently.

Delhi Public School (dps122noida) – Education Website

Next.js, React.js, Node.js, MongoDB, Ant Design

- Built an SEO-friendly frontend with React/Next.js/Ant Design and backend APIs for admissions, notices, and program workflows, plus a custom Admin Panel.

Velmore Living – Interior Design & Home Decor Platform

Next.js, Payload CMS, MongoDB, Tailwind CSS, Stripe

- Developed dynamic, SEO-optimised pages and reusable content blocks via Payload CMS; integrated OpenAI/Gemini APIs to auto-generate service-page copy, blog content, and metadata, reducing manual content-creation effort by an estimated 95%.

Keith Millage – Construction Workforce Management Platform

Node.js, Express.js, MongoDB, Firebase

- Built backend APIs and admin modules for a workforce management app, including mobile APIs for daily work reports and task updates, with optimised, scalable database structures.

ECI – Election Commission Voting Platform (Personal Project)

Node.js, React.js, MongoDB, JWT, Cloudinary, Render

- Built a secure role-based voting platform with an admin dashboard for 50+ candidates and real-time vote counting, reducing manual tallying time by 80%.

ERP Dashboard – Employee & Stock Management System (Personal Project)

Node.js, React.js, MongoDB, Google OAuth

- Built a role-based ERP dashboard with separate employee and manager logins (incl. Google OAuth), enabling employees to raise stock requests and managers to approve/reject with notes, with all actions recorded in an audit log.

EDUCATION

- MCA – Master of Computer Applications, Indira Gandhi National Open University (IGNOU), Delhi (Aug 2023 – 2026)
- B.Com (P) – Bachelor of Commerce (Programme), School of Open Learning (SOL), University of Delhi (Aug 2020 – 2023, GPA: 7)
- Diploma in Information Technology – Lal Bahadur Education Institute, Delhi (Oct 2021 – 2022, 85%)

CERTIFICATIONS & COURSES

- MERN Stack Developer – 4Achievers
- Web Development Bootcamp – Udemy (Online)
